INDEPENDENT AUDITOR'S REPORT

To the shareholders and Supervisory Board of Sberbank (Savings Bank of the Russian Federation):

- 1 We have audited the accompanying financial statements of Sberbank (Savings Bank of the Russian Federation (the "Bank") which comprise the balance sheet as at 31 December 2006 and the income statement, statement of changes in equity and statement of cashflows for the year then ended and a summary of significant accounting policies and other explanatory notes.

Management's Responsibility for the Financial Statements

- 2 Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

- 3 Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.
- 4 An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.
- 5 We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

- 6 In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Bank as of 31 December 2006, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards.

1 Introduction

These financial statements have been prepared in accordance with International Financial Reporting Standards for the year ended 31 December 2006 for Sberbank (Savings Bank of the Russian Federation) (the "Bank").

The Bank is a joint stock commercial bank established in 1841 and operated in various forms since then. The Bank was incorporated and is domiciled in the Russian Federation. The Bank's principal shareholder, the Central Bank of the Russian Federation (the "Bank of Russia"), owns 63.8% of ordinary shares or 60.6% of the issued and outstanding shares at 31 December 2006. On 21 December 2006 the Supervisory Board of the Bank approved the issuance of 3 500 000 additional ordinary shares by way of a public offering in Russia in the first quarter of 2007. The placement has changed the share of the Bank of Russia in the Bank's share capital. Please refer to Note 37.

The Supervisory Board of the Bank is headed by the Chairman of the Bank of Russia. The Supervisory Board also includes representatives from the Bank's other shareholders. Two Deputy Chairmen of the Bank of Russia are Deputy Chairmen of the Supervisory Board.

Principal activity. The Bank's principal business activity is corporate and retail banking operations within the Russian Federation. The Bank has operated under a full banking license issued by the Bank of Russia since 1991.

The Bank participates in the State deposit insurance scheme, which was introduced by the Federal Law #177-FZ "Deposits of individuals insurance in Russian Federation" dated 23 December 2003. The State Deposit Insurance Agency guarantees repayment of individual deposits up to RR 190 thousand per individual in case of the withdrawal of a license of a bank or a Bank of Russia imposed moratorium on payments.

During February 2007 the guarantee repayment of individual deposits under the State deposit insurance scheme was raised up to RR 400 thousand (approximately US Dollars 15 thousand) per individual in case of the withdrawal of a license of a bank or a Bank of Russia imposed moratorium on payments.

The Bank has 17 (2005:17) regional head offices, 840 (2005: 992) branches and 19 244 (2005:19 261) sub-branches within the Russian Federation as at 31 December 2006. The average number of the Bank's employees during 2006 was 243 620 (2005: 235 116).

Registered address and place of business. The Bank's registered address is: Vavilova str., 19, Moscow, Russian Federation.

Presentation currency. These financial statements are presented in millions of Russian Roubles ("RR millions").

2 Operating Environment of the Bank

High rates of economic growth in the Russian Federation gave rise to dynamic development of its banking system. During 2006 Fitch and Standard and Poor's, the international rating agencies, raised Russian sovereign foreign currency rating to the "BBB+" grade. In 2006 international rating agency Moody's also upgraded foreign currency country ceiling for Russian bonds to A2. On the whole the Russian Federation displays certain characteristics of an emerging market, including high rates of economic growth, continuing fall of inflation rates, liberalization of current and capital foreign transactions.

At the same time there is no confidence that the latest positive trends in the Russian economy will remain in future. The tax, currency and customs legislation within the Russian Federation is subject to varying interpretations, and changes, which can occur frequently. Furthermore, the need for further developments in the bankruptcy laws, the absence of formalised procedures for the registration and enforcement of collateral, and other legal and fiscal impediments contribute to the difficulties experienced by banks currently operating in the Russian Federation. The future economic direction of the Russian Federation is largely dependent upon the effectiveness of economic, financial and monetary measures undertaken by the Government, together with tax, legal, regulatory, and political developments.

3 Basis of Preparation and Significant Accounting Policies

Basis of Preparation. These financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") under the historical cost convention, as modified by the revaluation of premises, revaluation of available for sale financial assets, financial assets held at fair value through profit or loss and all derivative contracts.

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated. Refer to Note 5.

Key measurement terms. Depending on their classification financial instruments are carried at cost, fair value, or amortised cost as described below.

Cost is the amount of cash or cash equivalents paid or the fair value of the other consideration given to acquire an asset at the time of its acquisition and includes *transaction costs*. *Transaction costs* are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial instrument. An incremental cost is one that would not have been incurred if the transaction had not taken place. Transaction costs include fees and commissions paid to agents (including employees acting as selling agents), advisors, brokers and dealers, levies by regulatory agencies and securities exchanges, and transfer taxes and duties. Transaction costs do not include debt premiums or discounts, financing costs or internal administrative or holding costs. The cost based measurement for financial instruments is applied only in rare circumstances.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction. Fair value is the current bid price for financial assets and current asking price for financial liabilities which are quoted in an active market. A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange or other institution and those prices represent actual and regularly occurring market transactions on an arm's length basis.

Valuation techniques such as discounted cash flows models or models based on recent arm's length transactions or consideration of financial data of the investees are used to fair value certain financial instruments for which external market pricing information is not available. Valuation techniques may require assumptions not supported by observable market data. Disclosures are made in these financial statements if changing any such assumptions to a reasonably possible alternative would result in significantly different profit, income, total assets or total liabilities.

Amortised cost is the amount at which the financial instrument was recognised at initial recognition less any principal repayments, plus accrued interest, and for financial assets less any write-down for incurred impairment losses. Accrued interest includes amortisation of transaction costs deferred at initial recognition and of any premium or discount to maturity amount using the effective interest method. Accrued interest income and accrued interest expense, including both accrued coupon and amortised discount and premium (including fees deferred at origination, if any), are not presented separately and are included in the carrying values of the related balance sheet items.

The effective interest method is a method of allocating interest income or interest expense over the relevant period so as to achieve a constant periodic rate of interest (effective interest rate) on the carrying amount. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts (excluding future credit losses) through the expected life of the financial instrument or a shorter period, if appropriate, to the net carrying amount of the financial instrument. The effective interest rate discounts cash flows of variable interest instruments to the next interest repricing date except for the premium or discount which reflects the credit spread over the floating rate specified in the instrument, or other variables that are not reset to market rates. Such premiums or discounts are amortised over the whole expected life of the instrument. The present value calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate (refer to income and expense recognition policy).

3 Basis of Preparation and Significant Accounting Policies (Continued)

Initial recognition of financial instruments. Trading securities, other securities at fair value through profit or loss, derivatives are initially recorded at fair value. All other financial assets are initially recorded at fair value plus transaction costs. Fair value at initial recognition is best evidenced by the transaction price. A gain or loss on initial recognition is only recorded if there is a difference between fair value and transaction price which can be evidenced by other observable current market transactions in the same instrument or by a valuation technique whose inputs include only data from observable markets.

All purchases and sales of financial assets that require delivery within the time frame established by regulation or market convention ("regular way" purchases and sales) are recorded at trade date, which is the date that the Bank commits to deliver a financial instrument. All other purchases and sales are recognised when the entity becomes a party to the contractual provisions of the instrument.

Cash and cash equivalents. Cash and cash equivalents are items which can be converted into cash within a day. All short term interbank placements, beyond overnight placements, are included in due from other banks. Amounts, which relate to funds that are of a restricted nature, are excluded from cash and cash equivalents.

Mandatory cash balances with the Bank of Russia. Mandatory cash balances with the Bank of Russia are carried at amortised cost and represent non-interest bearing mandatory reserve deposits which are not available to finance the Bank's day to day operations and hence are not considered as part of cash and cash equivalents for the purposes of the statement of cash flows.

Trading securities. Trading securities are securities, which are either acquired for generating a profit from short-term fluctuations in price or trader's margin, or are securities included in a portfolio in which a pattern of short-term trading exists. The Bank classifies securities into trading securities if it has an intention to sell them within a short period after purchase, i.e. within six months. Trading securities are not reclassified out of this category even when the Bank's intentions subsequently change.

Trading securities are carried at fair value. Interest earned on trading securities calculated using the effective interest method is presented in the income statement as interest income. Dividends are included in dividend income within other operating income when the Bank's right to receive the dividend payment is established. Translation differences are included in foreign exchange translation net gains/(losses). All other elements of the changes in the fair value and gains or losses on derecognition are recorded in profit or loss as gains less losses arising from trading securities and other securities at fair value through profit or loss in the period in which they arise.

Other securities at fair value through profit or loss. Other securities at fair value through profit or loss are securities designated irrevocably, at initial recognition, into this category. Management designates securities into this category only if a group of financial assets is managed and its performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy, and information on that basis is regularly provided to and reviewed by the Bank's management bodies. Recognition and measurement of this category of financial assets is consistent with the above policy for trading securities.

Due from other banks. Amounts due from other banks are recorded when the Bank advances money to counterparty banks with no intention of trading the resulting unquoted non-derivative receivable due on fixed or determinable dates. Amounts due from other banks are carried at amortised cost.

Loans and advances to customers. Loans and advances to customers are recorded when the Bank advances money to purchase or originate an unquoted non-derivative receivable from a customer due on fixed or determinable dates and has no intention of trading the receivable. Loans and advances to customers are carried at amortised cost.

3 Basis of Preparation and Significant Accounting Policies (Continued)

Impairment of financial assets carried at amortised cost. Impairment losses are recognised in profit or loss when incurred as a result of one or more events ("loss events") that occurred after the initial recognition of the financial asset and which have an impact on the amount or timing of the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated. If the Bank determines that no objective evidence exists that impairment was incurred for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment.

For the purposes of a collective evaluation of impairment, financial assets are grouped on the basis of similar credit risk characteristics. Those characteristics are relevant to the estimation of future cash flows for groups of such assets by being indicative of the debtors' ability to pay all amounts due according to the contractual terms of the assets being evaluated.

Future cash flows in a group of financial assets that are collectively evaluated for impairment are estimated on the basis of the contractual cash flows of the assets and historical loss experience in respect of the extent to which amounts will become overdue as a result of past loss events and the success of recovery of overdue amounts. Past experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect past periods and to remove the effects of past conditions that do not exist currently.

Impairment losses are recognised through an allowance account to write down the asset's carrying amount to the present value of expected cash flows (which exclude future credit losses that have not been incurred) discounted at the original effective interest rate of the asset. The calculation of the present value of the estimated future cash flows of a collateralised financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral, whether or not foreclosure is probable.

After a loan has been written down as a result of impairment, interest income is then recognised using the interest rate used to discount the future cash flows for the purpose of measuring the impairment loss.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the previously recognised impairment loss is reversed by adjusting the allowance account through profit or loss.

Uncollectible assets are written off against the related impairment loss provision after all the necessary procedures to recover the asset have been completed and the amount of the loss has been determined.

Credit related commitments. In the normal course of business, the Bank enters into credit related commitments, including letters of credit, guarantees, commitments to extend credit and undrawn credit lines. Financial guarantees represent irrevocable assurance to make payments in the event that a customer cannot meet its obligations to third parties and carry the same credit risk as loans. Premiums received for the financial guarantees are amortised on a straight line basis during the life of the guarantee. In determining the amount of provision for financial guarantees, Management uses best estimates of the expenditures required to settle the obligations arising at the reporting date. The estimates of outcome and financial effect are determined based on experience of similar transactions and history of past losses, supplemented by the judgement of Management.

3 Basis of Preparation and Significant Accounting Policies (Continued)

Investment securities available for sale. This classification includes investment securities which the Bank intends to hold for an indefinite period of time and which may be sold in response to needs for liquidity or changes in interest rates, exchange rates or equity prices. The Bank classifies investments as available for sale at the time of purchase.

Investment securities available for sale are carried at fair value. Interest income on available for sale debt securities is calculated using the effective interest method and recognised in profit or loss. Dividends on available-for-sale equity instruments are recognised in profit or loss when the Bank's right to receive payment is established. All other elements of changes in the fair value are deferred in equity until the investment is derecognised or impaired, at which time the cumulative gain or loss is removed from equity to profit or loss.

Impairment losses are recognised in profit or loss when incurred as a result of one or more events ("loss events") that occurred after the initial recognition of investment securities available for sale. A significant or prolonged decline in the fair value of an equity security below its cost is an indicator that it is impaired. The cumulative impairment loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that asset previously recognised in profit or loss – is removed from equity and recognised in profit or loss. Impairment losses on equity instruments are not reversed through profit or loss. If, in a subsequent period, the fair value of a debt instrument classified as available for sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in profit or loss, the impairment loss is reversed through current period's profit or loss.

Sale and repurchase agreements. Sale and repurchase agreements ("repo agreements") are treated as secured financing transactions. Securities sold under sale and repurchase agreements are not derecognised. The securities are not reclassified in the balance sheet unless the transferee has the right by contract or custom to sell or repledge the securities, in which case they are reclassified as repurchase receivables. The corresponding liability is presented within amounts due to other banks.

Securities purchased under agreements to resell ("reverse repo agreements") are recorded as due from other banks or loans and advances to customers, as appropriate. The difference between the sale and repurchase price is treated as interest income and accrued over the life of repo agreements using the effective interest method.

Investment securities held to maturity. This classification includes quoted non-derivative financial assets with fixed or determinable payments and fixed maturities that the Bank has both the intention and ability to hold to maturity. Management determines the classification of investment securities held to maturity at their initial recognition. Investment securities held to maturity are carried at amortised cost.

Derecognition of financial assets. The Bank derecognises financial assets when (i) the assets are redeemed or the rights to cash flows from the assets otherwise expired or (ii) the Bank has transferred substantially all the risks and rewards of ownership of the assets or (iii) the Bank has neither transferred nor retained substantially all risks and rewards of ownership but has not retained control. Control is retained if the counterparty does not have the practical ability to sell the asset in its entirety to an unrelated third party without needing to impose additional restrictions on the sale.

Premises and equipment. Premises and equipment are stated at cost, restated to the equivalent purchasing power of the Russian Rouble at 31 December 2002 for assets acquired prior to 1 January 2003, or revalued amounts, as described below, less accumulated depreciation and provision for impairment, where required.

Premises of the Bank are subject to revaluation on a regular basis. The frequency of revaluation depends upon the movements in the fair values of the premises and equipment being revalued. The revaluation reserve for premises included in equity is transferred directly to retained earnings when the surplus is realised, i.e. either on the retirement or disposal of the asset, or as the asset is used by the Bank; in the latter case, the amount of the surplus realised is the difference between depreciation based on the revalued carrying amount of the asset and depreciation based on the asset's original cost.

3 Basis of Preparation and Significant Accounting Policies (Continued)

Premises have been revalued to market value at 31 December 2005. The revaluation was performed based on the reports of independent appraisers, who hold a recognised and relevant professional qualification and who have recent experience in valuation of assets of similar location and category. The basis used for the appraisal was fair value. Revalued premises are depreciated in accordance with their remaining useful life since 1 January 2006.

Construction in progress is carried at cost, less provision for impairment where required. Upon completion, assets are transferred to premises and equipment at their carrying amount. Construction in progress is not depreciated until the asset is available for use.

All other items of premises and equipment are stated at cost less accumulated depreciation and impairment losses, if any.

Costs of minor repairs and maintenance are expensed when incurred. Cost of replacing major parts or components of premises and equipment items are capitalised and the replaced part is retired.

If impaired, premises and equipment are written down to the higher of their value in use and fair value less costs to sell. The decrease in carrying amount is charged to profit or loss to the extent it exceeds the previous revaluation surplus in equity. An impairment loss recognised for an asset in prior years is reversed if there has been a change in the estimates used to determine the asset's value in use or fair value less costs to sell.

Gains and losses on disposals determined by comparing proceeds with carrying amount are recognised in profit or loss.

Depreciation. Land is not depreciated. Depreciation on other items of premises and equipment is calculated using the straight-line method to allocate cost or revalued amounts of premises and equipment to their residual values over the estimated remaining useful lives. The following annual rates are applied for the main categories of premises and equipment:

Premises	2.5-3.3%;
Office and computer equipment	25%; and
Vehicles and other equipment	18%.

The residual value of an asset is the estimated amount that the Bank would currently obtain from disposal of the asset less the estimated costs of disposal, if the asset were already of the age and in the condition expected at the end of its useful life. The residual value of an asset is nil if the Bank expects to use the asset until the end of its physical life. The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date.

Operating leases. Where the Bank is a lessee in a lease which does not transfer substantially all the risks and rewards incidental to ownership from the lessor to the Bank, the total lease payments, including those on expected termination, are charged to profit or loss on a straight-line basis over the period of the lease.

Due to other banks. Amounts due to other banks are recorded when money or other assets are advanced to the Bank by counterparty banks. The non-derivative liability is carried at amortised cost.

Deposits from individuals and customer accounts. Deposits from individuals and customer accounts are non-derivative liabilities to individuals, state or corporate customers and are carried at amortised cost.

Debt securities in issue. Debt securities in issue include promissory notes, certificates of deposit and savings certificates issued by the Bank. Debt securities in issue are stated at amortised cost.

3 Basis of Preparation and Significant Accounting Policies (Continued)

Other borrowed funds. Other borrowed funds represent medium and long-term funds attracted by the Bank on the international financial markets. Other borrowed funds are carried at amortised cost. If the Bank repurchases its borrowed funds, they are removed from the balance sheet and the difference between the carrying amount of the liability and the consideration paid is included in gains/(losses) arising from early retirement of debt.

Derivative financial instruments. Derivative financial instruments, including forward and futures foreign exchange contracts and forwards with precious metals, are carried at their fair value. All derivative instruments are carried as assets when fair value is positive and as liabilities when fair value is negative. Changes in the fair value of derivative instruments are included in profit or loss as gains less losses arising from trading in foreign currencies and other operating income. The Bank does not apply «hedge accounting» according to IAS 39.

Income taxes. Income taxes have been provided for in the financial statements in accordance with Russian legislation enacted or substantively enacted by the balance sheet date. The income tax charge comprises current tax and deferred tax and is recognised in the statement of income except if it is recognised directly in equity because it relates to transactions that are also recognised, in the same or a different period, directly in equity.

Current tax is the amount expected to be paid to or recovered from the taxation authorities in respect of taxable profits or losses for the current and prior periods. Taxes, other than on income, are recorded within administrative and other operating expenses.

Deferred income tax is provided using the balance sheet liability method for tax loss carry forwards and temporary differences arising between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. In accordance with the initial recognition exemption, deferred taxes are not recorded for temporary differences on initial recognition of an asset or a liability if the transaction, when initially recorded, affects neither accounting nor taxable profit. Deferred tax balances are measured at tax rates enacted or substantively enacted at the balance sheet date which are expected to apply to the period when the temporary differences will reverse or the tax loss carry forwards will be utilised. Deferred tax assets for deductible temporary differences and tax loss carry forwards are recorded in the balance sheet only to the extent that it is probable that future taxable profit will be available against which the deductions can be utilised.

Provision for liabilities and charges. Provisions for liabilities and charges are non-financial liabilities of uncertain timing or amount. They are accrued when the Bank has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made.

Trade and other payables. Trade payables are accrued when the counterparty performed its obligations under the contract and are carried at amortised cost.

Share premium. Share premium represents the excess of contributions over the nominal value of the shares issued.

Preference shares. Preference shares are not redeemable. Dividend payments are at the discretion of the Bank. When a dividend is paid, the preference shares attract a minimum payment of annual dividends of 15% of their nominal value, subject to confirmation of the shareholders' meeting. Dividend payments in excess of that minimum level are determined at the Bank's annual shareholders' meeting. Preference shares are classified as a part of equity.

Treasury shares. Where the Bank purchases the Bank's equity instruments, the consideration paid including any attributable incremental external costs net of income taxes is deducted from equity attributable to the equity holders of the Bank until they are cancelled or disposed of. Where such shares are subsequently disposed or reissued, any consideration received is included in equity.

3 Basis of Preparation and Significant Accounting Policies (Continued)

Dividends. Dividends are recorded in equity in the period in which they are declared. Dividends declared after the balance sheet date and before the financial statements are authorised for issue are disclosed in the subsequent events note. The statutory accounting reports of the Bank are the basis for profit distribution and other appropriations. Russian legislation identifies the basis of distribution as the current year net profit.

Income and expense recognition. Interest income and expense are recorded in the statement of income for interest-bearing instruments on an accrual basis using the effective interest method. This method defers, as part of interest income or expense, all fees paid or received between the parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

Fees integral to the effective interest rate include origination fees received or paid by the entity relating to the creation or acquisition of a financial asset or issuance of a financial liability, for example fees for evaluating creditworthiness, evaluating and recording guarantees or collateral, negotiating the terms of the instrument and for processing transaction documents. Commitment fees received by the Bank to originate loans at market interest rates are integral to the effective interest rate if it is probable that the Bank will enter into a specific lending arrangement and does not expect to sell the resulting loan shortly after origination. The Bank does not designate loan commitments as financial liabilities at fair value through profit or loss.

When loans and other debt instruments become doubtful of collection, they are written down to present value of expected cash inflows and interest income is thereafter recorded for the unwinding of the present value discount based on the asset's original effective interest rate which was used to measure the impairment loss.

All other fees, commissions and other income and expense items are generally recorded on an accrual basis by reference to completion of the specific transaction assessed on the basis of the actual service provided as a proportion of the total services to be provided.

Commissions and fees arising from negotiating, or participating in the negotiation of a transaction for a third party, such as the acquisition of loans, shares or other securities or the purchase or sale of businesses, which are earned on execution of the underlying transaction are recorded on its completion. Portfolio and other management advisory and service fees are recognised based on the applicable service contracts, usually on a time-proportion basis. Trust and custody services fees related to investment funds are recorded rateably over the period the service is provided.

Foreign currency translation. Functional currency of the Bank is the currency of the primary economic environment in which the Bank operates. The Bank's functional currency and presentation currency is the national currency of the Russian Federation, Russian Roubles ("RR").

Monetary assets and liabilities are translated into the Bank's functional currency at the official exchange rate of the Bank of Russia at the respective balance sheet dates. Foreign exchange gains and losses resulting from the settlement of the transactions and from the translation of monetary assets and liabilities into the Bank's functional currency at year-end official exchange rates of the Bank of Russia are recognised in profit or loss. Translation at year-end rates does not apply to non-monetary items.

At 31 December 2006 the principal rate of exchange used for translating foreign currency balances was USD 1 = RR 26.3311 (2005: USD 1 = RR 28.7825).

Fiduciary assets. Assets and liabilities held by the Bank in its own name, but on the account of third parties, are not reported on the balance sheet. The extent of such balances and transactions is indicated in Note 31. For the purposes of disclosure, fiduciary activities do not encompass safe custody functions. Commissions received from fiduciary activities are shown in fee and commission income.

3 Basis of Preparation and Significant Accounting Policies (Continued)

Contingent assets. Contingent assets are possible assets that arise from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Bank. Contingent assets are not recognised by the Bank in its balance sheet, but disclosed in the notes to the financial statements.

Offsetting. Financial assets and liabilities are offset and the net amount reported in the balance sheet only when there is a legally enforceable right to offset the recognised amounts, and there is an intention to either settle on a net basis, or to realise the asset and settle the liability simultaneously.

Accounting for the effects of hyperinflation. The Russian Federation has previously experienced relatively high levels of inflation and was considered to be hyperinflationary as defined by IAS 29 "Financial Reporting in Hyperinflationary Economies" ("IAS 29"). IAS 29 requires that the financial statements prepared in the currency of a hyperinflationary economy be stated in terms of the measuring unit current at the balance sheet date. It states that reporting operating results and financial position in the local currency without restatement is not useful because money loses purchasing power at such a rate that the comparison of amounts from transactions and other events that have occurred at different times, even within the same accounting period, is misleading.

The characteristics of the economic environment of the Russian Federation indicate that hyperinflation has ceased effective from 1 January 2003. Restatement procedures of IAS 29 are therefore only applied to assets acquired or revalued and liabilities incurred or assumed prior to that date. For these balances, the amounts expressed in the measuring unit current at as 31 December 2002 are the basis for the carrying amounts in these financial statements. The restatement was calculated using the conversion factors derived from the Russian Federation Consumer Price Index ("CPI"), published by the Russian Statistics Agency, and from indices obtained from other sources for years prior to 1992.

Staff costs and related contributions. Wages, salaries, contributions to the Russian Federation state pension and social insurance funds, paid annual leave and sick leave, bonuses, and non-monetary benefits are accrued in the year in which the associated services are rendered by the employees of the Bank.

Segment reporting. A segment is a distinguishable component of the Bank that is engaged either in providing products or services (business segment) or in providing products or services within a particular economic environment (geographical segment), which is subject to risks and rewards that are different from those of other segments. Segments with a majority of revenue earned from sales to external customers and whose revenue, result or assets are ten percent or more of all the segments are reported separately.

4 Critical Accounting Estimates and Judgements in Applying Accounting Policies

The Bank makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates and judgements are continually evaluated and are based on Management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Management also makes certain judgements, apart from those involving estimations, in the process of applying the accounting policies. Judgements that have the most significant effect on the amounts recognised in the financial statements and estimates that can cause a significant adjustment to the carrying amount of assets and liabilities within the next financial year include:

Held-to-maturity financial assets. Management applies judgement in assessing whether financial assets can be categorised as held-to-maturity, in particular its intention and ability to hold the assets to maturity. If the Bank fails to keep these investments to maturity other than for certain specific circumstances – for example, selling an insignificant amount close to maturity, or sale or reclassification is attributable to an isolated event that is beyond the Bank's control, is non-recurring and could not have been reasonably anticipated by the Bank – it will be required to reclassify the entire class as available-for-sale. The investments would therefore be measured at fair value rather than amortised cost. If the entire class of held-to-maturity investments was tainted, the carrying amount would increase by RR 21 352 million, with a corresponding entry to the fair value reserve in equity, net of deferred tax of RR 5 124 million.

4 Critical Accounting Estimates and Judgments in Applying Accounting Policies (Continued)

Impairment losses on loans and advances. The Bank regularly reviews its loan portfolios to assess impairment. In determining whether an impairment loss should be recorded in the statement of income, the Bank makes judgements as to whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of loans before the decrease can be identified with an individual loan in that portfolio. This evidence may include observable data indicating that there has been an adverse change in the payment status of borrowers in a group, or national or local economic conditions that correlate with defaults on assets in the group. Management uses estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio when scheduling its future cash flows. For new types of loans, where the Bank has not collected statistics of historical losses, market information on historical losses of similar groups of loans is used to assess incurred but not yet reported losses on such groups of loans. Also, the Bank's management accounting system in some cases does not allow to collect all necessary information on incurred losses for certain groups of loans. Management uses estimates and incurred loss models for groups of loans with similar credit risk profile. Management is also in process of upgrading Bank's accounting systems to produce fully the information required for proper application of loan portfolio impairment assessment. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

Tax legislation. Russian tax, currency and customs legislation is subject to varying interpretations. Refer to Note 31.

Fair Value of Financial Instruments. Fair value is the amount at which a financial instrument could be exchanged in a current transaction between willing parties, other than in a forced sale or liquidation, and is best evidenced by an active quoted market price. The estimated fair values of financial instruments have been determined by the Bank using available market information, where it exists, and appropriate valuation methodologies. However, judgement is necessarily required to interpret market data to determine the estimated fair value. The fair values of financial derivatives that are not quoted in active markets are determined by using valuation techniques. To the extent practical, models use only observable data, however certain areas require Management to make estimates. Changes in assumptions about these factors could affect reported fair values. The Russian Federation continues to display some characteristics of an emerging market and economic conditions continue to limit the volume of activity in the financial markets. Market quotations may be outdated or reflect distress sale transactions and therefore not represent fair values of financial instruments. Management has used all available market information in estimating the fair value of financial instruments.

Capital Adequacy Ratio. Capital Adequacy Ratio is calculated in accordance with the International Convergence of Capital Measurement and Capital Standards (July 1988, updated to November 2005) (or Basel Capital Accord) requirements. Such requirements are subject to interpretation and accordingly the appropriateness of the inclusion, exclusion, and/or classification of amounts included in the calculation of the Capital Adequacy Ratio requires Management judgement.

Related party transactions. The Bank's principal shareholder is the Bank of Russia (refer to Note 1). As the Bank applies IAS 24 "Related Party Disclosures" (revised), disclosures are made in these financial statements for transactions with state-controlled entities and government bodies. Currently the Government of the Russian Federation does not provide to the general public or entities under its ownership/control a complete list of the entities which are owned or controlled directly or indirectly by the State. Judgement is applied by the Management in determining the scope of operations with related parties to be disclosed in the financial statements. Refer to Notes 34 and 35.

5 Adoption of New or Revised Standards and Interpretations

Certain new IFRSs became effective for the Bank from 1 January 2006. Listed below are those new or amended standards or interpretations, which are or in the future could be relevant to the Bank's operations and the nature of their impact on the Bank's accounting policies. All changes in accounting policies were applied retrospectively with adjustments made to the retained earnings at 1 January 2005, unless otherwise described below.

IFRIC 4 – Determining whether an Arrangement contains a Lease (effective from 1 January 2006). IFRIC 4 requires that determining whether an arrangement is, or contains, a lease be based on the substance of the arrangement. It requires an assessment of whether (a) fulfilment of the arrangement is dependent on the use of a specific asset or assets (the asset); and (b) the arrangement conveys a right to use the asset.

IAS 39 (Amendment) – The Fair Value Option (effective from 1 January 2006). IAS 39 (as revised in 2003) permitted entities to designate irrevocably on initial recognition practically any financial instrument as one to be measured at fair value with gains and losses recognised in profit or loss ('fair value through profit or loss'). The amendment changes the definition of financial instruments 'at fair value through profit or loss' and restricts the ability to designate financial instruments as part of this category. Financial instruments designated into the category "at fair value through profit or loss" have been and continue to be managed on a fair value basis, in accordance with a documented investment strategy in place since the initial recognition of these financial instruments and information on that basis is regularly provided to and reviewed by the Bank's management bodies.

IAS 39 (Amendment) – Financial Guarantee Contracts (effective from 1 January 2006). Issued financial guarantees, other than those previously asserted by the entity to be insurance contracts, will have to be initially recognised at their fair value, and subsequently measured at the higher of (i) the unamortised balance of the related fees received and deferred and (ii) the amount recognised under IAS 37 "Provisions, Contingent Liabilities and Contingent Assets".

IAS 19 (Amendment) – Employee Benefits (effective from 1 January 2006). The amendment introduced an additional option to recognise actuarial gains and losses arising in post-employment defined benefit plans in full directly in retained earnings in equity. It also requires new disclosures about defined benefit plans and clarifies accounting for a contractual agreement between a multi-employer plan and participating employers.

The application of these amendments and interpretations did not have a significant impact on these financial statements.

6 New Accounting Pronouncements

Certain new standards and interpretations have been published that are mandatory for the Bank's accounting periods beginning on or after 1 January 2007 or later periods and which the Bank has not early adopted:

IFRS 7 Financial Instruments: Disclosures and a complementary Amendment to IAS 1 Presentation of Financial Statements - Capital Disclosures. The IFRS introduces new disclosures to improve the information about financial instruments. The volume of disclosures will increase significantly with an emphasis on quantitative aspects of risk exposures and the methods of risk management. The quantitative disclosures will provide information about the extent of exposure to risk, based on information provided internally to the entity's key management personnel. Qualitative and quantitative disclosures will cover exposure to credit risk, liquidity risk and market risk including sensitivity analysis to market risk. IFRS 7 replaces IAS 30, Disclosures in the Financial Statements of Banks and Similar Financial Institutions, and some of the requirements in IAS 32, Financial Instruments: Disclosure and Presentation. The Amendment to IAS 1 introduces disclosures about level of an entity's capital and how it manages capital. The Bank is currently assessing what impact the new IFRS and the amendment to IAS 1 will have on disclosures in its financial statements.

6 New Accounting Pronouncements (Continued)

Other new standards or interpretations. The Bank has not early adopted the following other new standards or interpretations:

IFRIC 7, "Applying the Restatement Approach under IAS 29", effective for annual periods beginning on or after 1 March 2006. This interpretation is not relevant for the Bank;

IFRIC 8, "Scope of IFRS 2", effective for annual periods beginning on or after 1 May 2006. Management does not expect the interpretation to be relevant for the Bank;

IFRIC 9, "Reassessment of Embedded Derivatives", effective for annual periods beginning on or after 1 June 2006. Management does not expect the interpretation to be relevant for the Bank;

IFRIC 10, "Interim Financial Reporting and Impairment", effective for annual periods beginning on or after 1 November 2006. The Interpretation states that an entity should not reverse an impairment loss recognised in a previous interim period in respect of goodwill or an investment in either an equity instrument or a financial asset carried at cost. Management does not expect the interpretation have any material impact on the Bank;

IFRIC 11, "IFRS 2 – Group and Treasury Shares Transactions", effective for annual periods beginning on or after 1 March 2007. This interpretation is not relevant for the Bank.

IFRIC 12, "Service Concession Arrangements", effective for annual periods beginning on or after 1 January 2008. This interpretation is not relevant for the Bank; and

IFRS 8, "Operating segments", effective for annual periods beginning on or after 1 January 2009. The Standard applies to entities whose debt or equity instruments are traded in a public market or that file, or are in the process of filing, their financial statements with a regulatory organisation for the purpose of issuing any class of instruments in a public market. IFRS 8 requires the Bank to report financial and descriptive information about its operating segments and specifies how the Bank should report such information.

IAS 23, Borrowing Costs (revised March 2007; effective for annual periods beginning on or after 1 January 2009) The revised Standard removed the option of immediate recognition as an expense of borrowing costs related to assets that take a substantial period of time to get ready for use or sale. An entity is, therefore, required to capitalize such borrowing costs as part of the cost of the asset. The revised Standard applies prospectively to borrowing costs relating to qualifying assets for which the commencement date for capitalization is on or after 1 January 2009. Management does not expect the revised standart have any material impact on the Bank.

7 Cash and Cash Equivalents

<i>In millions of Russian Roubles</i>	2006	2005
Cash on hand	83 699	58 282
Cash balances with the Bank of Russia (other than mandatory reserve deposits)	8 221	26 946
Correspondent accounts and overnight placements with other banks		
- Russian Federation	25 853	14 551
- Other countries	52 032	23 590
Total cash and cash equivalents	169 805	123 369

Geographical, currency and interest rate analyses of cash and cash equivalents are disclosed in Note 30. The information on related party balances is disclosed in Notes 34 and 35.

8 Trading securities

<i>In millions of Russian Roubles</i>	2006	2005
Bonds of the Bank of Russia	87 500	24 461
Federal loan bonds (OFZ bonds)	65 898	52 662
Russian Federation Eurobonds	29 473	35 956
Municipal and subfederal bonds	13 485	7 423
Corporate bonds	8 762	5 620
VneshEconomBank bonds (VEB bonds)	5 045	5 194
Corporate shares	478	499
Total trading securities	210 641	131 815

Bonds of the Bank of Russia are non interest-bearing RR denominated securities issued by the Bank of Russia at a discount. These bonds have maturity date from June 2009 to September 2009 (2005: from June 2009 to September 2009); the Bank of Russia put an irrevocable offer for sale of these bonds in March and June 2007. Yield to offer – from 5% to 10% p.a. (2005: 5% p.a.).

OFZ bonds are RR denominated government securities issued by the Ministry of Finance of the Russian Federation. OFZ bonds have maturity dates from June 2007 to February 2036 (2005: from February 2006 to November 2021), coupon rates from 0% to 10% p.a. (2005: from 0% to 10% p.a.) and yield to maturity from 3% to 7% p.a. (2005: from 4% to 7% p.a.), depending on the type of bond issue.

Russian Federation Eurobonds are interest-bearing securities denominated in USD, issued by the Ministry of Finance of the Russian Federation, and are freely tradable internationally. These bonds have maturity dates from June 2007 to March 2030 (2005: from June 2007 to March 2030), coupon rates from 5% to 13% p.a. (2005: from 5% to 13% p.a.) and yield to maturity from 5% to 6% p.a. (2005: from 5% to 6% p.a.), depending on the type of bond issue.

Municipal and subfederal bonds are interest-bearing securities denominated in RR and issued by municipal and subfederal bodies of the Russian Federation. These bonds have maturity dates from April 2007 to June 2015 (2005: from April 2006 to December 2014), coupon rates from 7% to 14% p.a. (2005: from 7% to 17% p.a.) and yield to maturity from 3% to 11% p.a. (2005: from 3% to 11% p.a.), depending on the type of bond issue.

Corporate bonds are interest bearing securities denominated in RR, issued by large Russian companies. These bonds have maturity dates from April 2007 to March 2012 (2005: from February 2006 to November 2012), coupon rates from 7% to 14% p.a. (2005: from 7% to 15% p.a.) and yield to maturity from 5% to 12% p.a. (2005: from 6% to 13% p.a.), depending on the type of bond issue.

VEB bonds are bearer interest bearing securities denominated in USD and issued by the Ministry of Finance of the Russian Federation. The bonds carry an annual coupon of 3% p.a., have maturity dates from November 2007 to May 2011 (2005: from May 2006 to May 2011) and yield to maturity from 5% to 6% p.a. (2005: from 5% to 6% p.a.), depending on the type of bond issue.

Corporate shares are quoted shares of large Russian companies.

Geographical, currency and interest rate analyses of trading securities are disclosed in Note 30. The information on trading securities issued by related parties is disclosed in Notes 34 and 35.

9 Other Securities at Fair Value through Profit or Loss

<i>In millions of Russian Roubles</i>	2006	2005
Federal loan bonds (OFZ bonds)	186 667	178 500
Municipal and subfederal bonds	26 681	32 408
Corporate shares	14 144	12 672
Corporate bonds	10 340	3 684
Russian Federation Eurobonds	15	17
Total other securities at fair value through profit or loss	237 847	227 281

OFZ bonds have maturity dates from June 2007 to August 2025 (2005: from February 2006 to November 2021), coupon rates from 0% to 10% p.a. (2005: from 0% to 10% p.a.) and yield to maturity from 3% to 7% p.a. (2005: from 4% to 7% p.a.), depending on the type of bond issue.

Municipal and subfederal bonds have maturity dates from April 2007 to December 2014 (2005: from March 2006 to December 2014), coupon rates of 8% to 14% p.a. (2005: from 9% to 17% p.a.) and yield to maturity from 3% to 11% p.a. (2005: from 3% to 11% p.a.), depending on the type of bond issue.

Corporate shares are quoted shares of large Russian companies.

Corporate bonds have maturity dates from March 2007 to July 2013 (2005: from March 2007 to July 2010), coupon rates from 8% to 14% p.a. (2005: from 8% to 15% p.a.) and yield to maturity from 5% to 12% p.a. (2005: from 5% to 13% p.a.), depending on the type of bond issue.

Russian Federation Eurobonds have maturity date up to March 2030 (2005: March 2030), coupon rate of 5% p.a. (2005: 5% p.a.) and yield to maturity of 6% p.a. (2005: 6% p.a.).

Geographical, currency and interest rate analyses of other securities at fair value through profit or loss are disclosed in Note 30. The information on other securities at fair value through profit or loss issued by related parties is disclosed in Note 35.

10 Due from Other Banks

<i>In millions of Russian Roubles</i>	2006	2005
Short-term placements with other banks	37 856	23 189
Reverse sale and repurchase agreements with other banks	3 420	2 743
Total due from other banks	41 276	25 932

At 31 December 2006 amounts due from other banks in the amount of RR 3 420 million (2005: RR 2 743 million) are effectively collateralised by securities purchased under reverse sale and repurchase agreements at a fair value of RR 3 476 million (2005: at fair value of RR 2 903 million).

At 31 December 2006 the estimated fair value of due from other banks was RR 41 276 million (2005: RR 25 932 million). Refer to Note 33.

Geographical, currency, maturity and interest rate analyses of due from other banks are disclosed in Note 30. The information on related party balances is disclosed in Notes 34 and 35.

11 Loans and Advances to Customers

<i>In millions of Russian Roubles</i>	2006	2005
Current loans	2 595 458	1 856 803
Overdue loans	29 129	19 723
Reverse sale and repurchase agreements	17 907	3 840
Less: Provision for loan impairment	(100 877)	(93 078)
Total loans and advances to customers	2 541 617	1 787 288

Overdue loans (payments that overdue by more than one day) represent the amount of overdue loan payments and do not include the entire outstanding balance of the loans with overdue payments.

At 31 December 2006 loans and advances to customers in the amount of RR 17 907 million (2005: RR 3 840 million) are effectively collateralised by securities purchased under reverse sale and repurchase agreements at a fair value of RR 22 204 million (2005: RR 4 227 million).

Movements in the provision for loan impairment are as follows:

<i>In millions of Russian Roubles</i>	2006	2005
Provision for loan impairment at 1 January	93 078	79 359
Provision for loan impairment during the year	13 851	19 602
Loans and advances to customers written off during the year as uncollectible	(6 052)	(5 883)
Provision for loan impairment at 31 December	100 877	93 078

Economic sector risk concentrations within the customer loan portfolio are as follows:

	2006		2005	
	Amount	%	Amount	%
Individuals	692 722	26.2	467 833	24.9
Trade	490 422	18.6	405 491	21.6

Total loans and advances to customers, gross	2 642 494	100.0	1 880 366	100.0

At 31 December 2006 the Bank had 10 borrowers with aggregated loan amounts above RR 22 700 million (2005: 10 borrowers with aggregated loan amounts above RR 17 100 million). The total aggregate amount of these loans was RR 406 997 million or 15.4% of the total gross loan portfolio (2005: RR 311 443 million or 16.6%).

11 Loans and Advances to Customers (Continued)

At 31 December 2006 the estimated fair value of loans and advances to customers was RR 2 541 617 million (2005: RR 1 787 288 million). Refer to Note 33.

Geographical, currency, maturity and interest rate analyses of loans and advances to customers are disclosed in Note 30. The information on related party balances is disclosed in Notes 34 and 35.

12 Investment Securities Held to Maturity

<i>In millions of Russian Roubles</i>	2006	2005
Russian Federation Eurobonds	26 198	28 399
Total investment securities held to maturity	26 198	28 399

The movement in investment securities held to maturity is as follows:

<i>In millions of Russian Roubles</i>	2006	2005
Gross amount at 1 January	28 399	35 650
Interest income accrued	3 841	5 105
Coupon received	(3 657)	(4 951)
Disposal of securities	-	(8 762)
Exchange differences relating to debt securities	(2 385)	1 357
Gross amount at 31 December	26 198	28 399

Russian Federation Eurobonds have maturity date up to July 2018 (2005: July 2018), coupon rate of 11.0% p.a. (2005: 11.0% p.a.) and yield to maturity of 5.8% p.a. (2005: 5.6% p.a.).

At 31 December 2006 the estimated fair value of investment securities held to maturity was RR 47 550 million (2005: RR 53 501 million). Refer to Note 33.

Geographical, currency, maturity and interest rate analyses of investment securities held to maturity are disclosed in Note 30. The information on related party balances is disclosed in Note 35.

Carrying amount at 31 December 2006		86 237	25 508	4 749	8 722	125 216

Construction in progress consists of construction and refurbishment of branch premises. Upon completion, assets are transferred to premises.

Premises were independently valued at 31 December 2005. The valuation was carried out by an independent firm of valuers. The basis used for the appraisal was fair value. Fair values were estimated using appropriate valuation techniques and using observable market prices in an active market. At 31 December 2006 premises are stated at revalued amount less accumulated depreciation since 1 January 2006.

13 Premises and Equipment (Continued)

At 31 December 2006 the carrying amount of fixed assets would have been RR 104 965 million (2005: RR 86 533 million) had the assets been carried at cost less depreciation.

At 31 December 2006 included in office and computer equipment are fully amortised items in the amount of RR 7 206 million (2005: RR 7 642 million) and in vehicles and other equipment in the amount of RR 1 677 million (2005: RR 2 597 million).

14 Other Assets

<i>In millions of Russian Roubles</i>	2006	2005
Plastic cards receivables	18 895	11 889
Precious metals	6 746	3 970
Trade debtors and prepayments	2 479	1 419
Prepaid expenses	2 028	1 539
Prepaid taxes other than on income	814	1 802
Funds in settlement	808	421
Other	4 388	2 686
Total other assets	36 158	23 726

As at 31 December 2006 plastic cards receivables of RR 18 895 million (2005: RR 11 889 million) represent receivables due within 30 days on operations of the Bank's customers with plastic cards.

Restricted cash represents balances on correspondent accounts with foreign banks placed by the Bank on behalf of its customers. The Bank has received restricted deposits from these customers in the same amounts, which are recorded in customer accounts. Refer to Note 31.

Geographical, currency and maturity analyses of other assets are disclosed in Note 30. The information on related party balances is disclosed in Note 34.

15 Due to Other Banks

<i>In millions of Russian Roubles</i>	2006	2005
Correspondent accounts and overnight placements of other banks	39 354	22 833
Current term placements of other banks	5 482	607
Sale and repurchase agreements with other banks	-	1 472
Total due to other banks	44 836	24 912

At 31 December 2006 the estimated fair value of due to other banks was RR 44 836 million (2005: RR 24 912 million). Refer to Note 33.

Geographical, currency, maturity and interest rate analyses of due to other banks are disclosed in Note 30.

16 Deposits from Individuals and Customer Accounts

<i>In millions of Russian Roubles</i>	2006	2005
Individuals		
- Current/demand accounts	201 586	136 100

Total deposits from individuals and customer accounts	2 828 824	100.0	2 061 108	100.0

At 31 December 2006 included in customer accounts are deposits of RR 50 714 million (2005: RR 33 113 million) held as collateral for irrevocable commitments under import letters of credit. Refer to Note 31.

At 31 December 2006 the estimated fair value of customer accounts was RR 2 828 824 million (2005: RR 2 061 108 million). Refer to Note 33.

Geographical, currency, maturity and interest rate analyses of customer accounts are disclosed in Note 30. The information on related party balances is disclosed in Notes 34 and 35.

17 Debt Securities in Issue

<i>In millions of Russian Roubles</i>	2006	2005
Promissory notes	106 730	79 264
Savings certificates	14 108	6 298
Deposit certificates	2 891	1 328
Total debt securities in issue	123 729	86 890

Promissory notes are interest-bearing or discount securities issued by the Bank. They are denominated in RR, USD and Euro and have maturity dates from "on demand" to April 2012 (2005: from "on demand" to May 2009). Interest or discount rates on promissory notes issued by the Bank vary from 1.4% to 11.0% p.a. (2005: from 4.3% to 6.1% p.a.). Promissory notes are freely tradable on the Russian financial market.

Savings and deposits certificates are interest-bearing securities issued by the Bank. They are denominated in RR, USD, Euro and have maturity dates from "on demand" to March 2009 (2005: from "on demand" to March 2007). Interest rates on these securities vary from 1.7% till 10.2% p.a. (2005: from 2.1% to 3.0% p.a.).

At 31 December 2006 the estimated fair value of debt securities in issue was RR 119 148 million (2005: RR 85 510 million). Refer to Note 33.

Geographical, currency, maturity and interest rate analyses of debt securities in issue are disclosed in Note 30.

18 Other Borrowed Funds

<i>In millions of Russian Roubles</i>	2006	2005
Long-term loans received	99 247	57 598
Term borrowings	8 085	5 366
Total other borrowed funds	107 332	62 964

At 31 December 2006 included in long-term loans received is a syndicated loan in the amount of USD 1 000 million which was received by the Bank in December 2005 from a consortium of foreign banks. As at 31 December 2006 the loan was accounted for at amortised cost of RR 26 463 million (2005: RR 28 716 million). This loan has a maturity date on 10 November 2008 and contractual floating interest rate of 3 months LIBOR + 0.55%. As at 31 December 2006 the effective interest rate on the loan was 6.3% p.a. (2005: 5.4% p.a.).

In October 2006 the Bank received another syndicated loan in the amount of USD 1 500 million from a consortium of foreign banks, which is also included in long-term loans received. As at 31 December 2006 the loan was accounted for at amortised cost of RR 39 649 million. This loan matures in October 2009 and has contractual floating interest rate of 3 months LIBOR + 0.30%. As at 31 December 2006 the effective interest rate on the loan was 5.9% p.a.

In May 2006 the Bank entered into USD 10 000 million loan participation notes (MTN) issuance programme. In May 2006 the Bank received the first loan under this programme in the amount of USD 500 million, which is included in long-term loans received. As at 31 December 2006 this loan was accounted for at amortised cost of RR 13 256 million. This loan matures in May 2013 and has contractual fixed interest rate of 6.5% p.a. As at 31 December 2006 the effective interest rate on the loan was 6.6% p.a.

In November 2006 the Bank attracted the second loan under the MTN issuance programme in the amount of USD 750 million, which is also included in long-term loans received. As at 31 December 2006 this loan was accounted for at amortised cost of RR 19 879 million. This loan matures in November 2011 and has contractual fixed interest rate of 5.9% p.a. As at 31 December 2006 the effective interest rate on the loan was 6.0% p.a.

18 Other Borrowed Funds (Continued)

Term borrowings represent funding received by the Bank from foreign export agencies via foreign banks, which was used by Sberbank for direct lending to Russian companies in accordance with the terms of the agreements. As at 31 December 2006 these term borrowings were accounted for at amortised cost of RR 8 085 million (2005: RR 5 366 million), had interest rates varying from 3.9% to 6.8% p.a. (2005: from 2.8% to 6.4% p.a.) and maturity dates from July 2007 to January 2016 (2005: from February 2006 to January 2016).

At 31 December 2006 the estimated fair value of other borrowed funds was RR 108 174 million (2005: RR 63 296 million). Refer to Note 33.

Geographical, currency, maturity and interest rate analyses of other borrowed funds are disclosed in Note 30.

19 Other Liabilities

<i>In millions of Russian Roubles</i>	Note	2006	2005
Accrued employee benefit costs		9 822	5 586
Taxes payable		4 448	3 971
Deposit insurance system fees payable		2 824	2 124
Funds in settlement		2 520	1 036
Plastic card payables		1 391	634
Trade payables		378	320
Foreign exchange forwards	32	59	34
Precious metal forwards	32	43	45
Other		1 459	712
Total other liabilities		22 944	14 462

Geographical, currency and maturity analyses of other liabilities are disclosed in Note 30.

20 Subordinated Debt

<i>In millions of Russian Roubles</i>	2006	2005
Subordinated debt	26 880	29 393
Total subordinated debt	26 880	29 393

In 2005 the Bank received a subordinated loan. This transaction was structured by UBS Luxembourg S.A. as an issue of aggregate principal amount of USD 1 000 million 6.2% p.a. Loan Participation Notes due in February 2015 for the sole purpose of financing a ten-year subordinated loan to the Bank. As at 31 December 2006 this subordinated debt was accounted for at amortised cost of RR 26 880 million (2005: RR 29 393 thousand).

In the event of the Bank's liquidation the creditors under this subordinated debt would be the last ones to receive repayment.

As at 31 December 2006 the estimated fair value of subordinated debt was RR 27 256 million (2005: RR 29 185 million). Refer to Note 33.

Geographical, currency and maturity analyses of subordinated debt are disclosed in Note 30.

21 Share Capital and Share Premium

<i>In millions of Russian Roubles</i>	2006			2005		
	Number of shares, in units	Nominal amount	Inflation adjusted amount	Number of shares, in units	Nominal amount	Inflation adjusted amount
Ordinary shares	19 000 000	57 000	75 576	19 000 000	950	19 526
Preference shares	50 000 000	3 000	4 405	50 000 000	50	1 455
Less: Treasury shares						
- Ordinary shares	(1 787)	(5)	-	(1 787)	-	-
- Preference shares	-	-	-	(1 144)	-	-
Total share capital	68 998 213	59 995	79 981	68 997 069	1 000	20 981

As at 31 December 2005 nominal value of ordinary shares of the Bank was RR 50 per share and for preference shares RR 1 per share.

All ordinary shares rank equally. Each share carries one vote.

In August 2006 the Bank increased the nominal value of its ordinary and preference shares sixty times via capitalisation of the statutory revaluation reserve for premises. Consequently, all ordinary shares have nominal value of RR 3 000 per share and the preference shares have a nominal value of RR 60 per share. This transaction did not require any use of cash and cash equivalents and was therefore excluded from the statement of cash flows for 2006.

Preference shares carry no voting rights but rank ahead of the ordinary shares in the event of the Bank's liquidation. Preference shares are not redeemable. Dividend payments are at the discretion of the Bank. When a dividend is paid, the preference shares attract a minimum payment of annual dividends of 15% of their nominal value, subject to approval by the shareholders meeting. If preference dividends are not declared by ordinary shareholders, the preference shareholders obtain the right to vote as ordinary shareholders but lose this right when the next dividend is paid. Preference share dividends are set at 590% p.a. in 2006 for the year ended 31 December 2005 (2005: 379% p.a. for the year ended 31 December 2004) and rank above ordinary dividends.

On 21 December 2006, the Supervisory Board of the Bank approved the issuance of 3 500 000 additional ordinary shares by way of a public offering in Russia in the first quarter of 2007. Refer to Note 37.

Share premium of RR 10 016 million (2005: RR 10 016 million) represents the excess of contributions received over the nominal value of shares issued.

22 Retained Earnings

In accordance with Russian legislation, the Bank distributes profits as dividends or transfers them to reserves (fund accounts) on the basis of financial statements prepared in accordance with Russian Accounting Rules. The Bank's reserves under Russian Accounting Rules at 31 December 2006 are RR 282 650 million (2005: RR 207 045 million).

Included in staff costs are statutory social security and pension contributions of RR 13 697 million (2005: RR 11 506 million).

26 Income Taxes

Income tax expense comprises the following:

<i>In millions of Russian Roubles</i>	2006	2005
Current tax	24 942	18 257
Deferred tax	1 274	8 432
Less: Deferred tax recorded directly in equity	-	(4 875)
Income tax expense for the year	26 216	21 814

The income tax rate applicable to the majority of the Bank's income is 24% (2005: 24%). A reconciliation between the expected and the actual taxation charge is provided below.

<i>In millions of Russian Roubles</i>	2006	2005
IFRS profit before tax	109 020	87 622
Theoretical tax charge at statutory rate (2006: 24%; 2005: 24%)	26 165	21 029
Income on government securities taxed at different rates	(2 305)	(2 143)
Tax effect of items which are not deductible or assessable for taxation purposes:		
- Income which is exempt from taxation	(36)	(49)
- Non-deductible staff costs	1 370	967
- Other non deductible expenses	257	689
- Other non-temporary differences	765	1 321
Income tax expense for the year	26 216	21 814

At 31 December 2005 a deferred tax liability of RR 4 876 million has been recorded directly in equity in respect of the revaluation of the Bank's premises. Refer to Note 13. At 31 December 2005 a reversal of deferred tax liability of RR 1 million has been recorded directly in equity in respect of the fair valuation of investment securities available for sale.

26 Income Taxes (Continued)

Differences between IFRS and Russian statutory taxation regulations give rise to temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and their tax bases. The tax effect of the movements in these temporary differences is detailed below and is recorded at the rate of 24% (2005: 24%), except for income on state securities that is taxed at 15% (2005: 15%).

<i>In millions of Russian Roubles</i>	31 December 2005	(Charged)/ credited to profit or loss	31 December 2006

27 Earnings per Share

Basic earnings per share are calculated by dividing the profit attributable to equity holders of the Bank by the weighted average number of ordinary shares in issue during the year, excluding treasury shares. The Bank has no dilutive potential ordinary shares; therefore, the diluted earnings per share equal the basic earnings per share.

<i>In millions of Russian Roubles</i>	2006	2005
Profit attributable to equity holders of the Bank	82 804	65 808
Less: preference dividends	(295)	(190)
Profit attributable to the Bank's ordinary shareholders	82 509	65 618
Weighted average number of ordinary shares in issue (millions)	19	19
Basic and diluted ordinary earnings per share (expressed in RR per share)	4 343	3 454

Sberbank (Savings Bank of the Russian Federation)
Notes to the Financial Statements - 31 December 2006

28 Dividends

<i>In millions of Russian Roubles</i>	2006		2005	
	Ordinary	Preference	Ordinary	Preference
Dividends payable at 1 January	41	12	28	8
Dividends declared during the year	5 054	295	3 304	190

Dividends payable at 31 December	59	18	41	12
Dividends per share declared during the year (RR per share)	266.00	5.90	173.90	3.79

All dividends are declared and paid in Russian Roubles.

29 Segment Analysis

The Bank's primary format for reporting segment information is business segments and the secondary format is geographical segments.

Business Segments. The Bank is organised on a basis of two main business segments:

- Retail banking – representing private customer current accounts, savings, deposits, custody, debit cards, consumer loans and mortgages.
- Corporate banking – representing current accounts, deposits, overdrafts, loan and other credit facilities, foreign currency and derivative products.

In 2006 the Bank measured business segment revenues, expenses and results on the basis of inter-segment prices used for internal management purposes only. The comparative information for the year ended 31 December 2005 has been presented on the same basis, as required by IAS 14 "Segment Reporting".

For the purposes of these financial statements segment revenue consists of interest income and fees and commission income for the certain segment.

Segment information for the main reportable business segments of the Bank for the years ended 31 December 2006 and 2005 is set out below.

29 Segment Analysis (Continued)

Geographical segments. Geographical segment information is based on the Bank's activity among its central head office and 17 regional head offices. The Bank has defined five geographical segments:

Geographical segment	Name of territorial bank	Location of the regional head offices
Moscow	Central head office	Moscow
European Russia	Severny	Yaroslavl
	Severo-Zapadny	Saint-Petersburg
	Tsentralno-Chernozemny	Voronezh
	Volgo-Vyatsky	Nizhniy Novgorod
	Povolzhsky	Samara
	Srednerussky	Moscow
	Severo-Kavkazsky	Stavropol
Ural	Yugo-Zapadny	Rostov-on-Don
	Zapadno-Uralsky Uralsky	Perm Ekaterinburg
Western Siberia	Sibirsky	Novosibirsk
	Altaisky	Barnaul
	Zapadno-Sibirsky	Tumen
Eastern Siberia and Far East	Severo-Vostochny	Magadan
	Dalnevostochny	Khabarovsk
	Vostochno-Sibirsky	Krasnoyarsk
	Baikalsky	Irkutsk

Segment information for the main geographical segments of the Bank is set out below for the years ended 31 December 2006 and 31 December 2005.

30 Financial Risk Management

The risk management function within the Bank is carried out in respect of major types of risks: credit, market (includes interest rate, equity and currency risks), liquidity risk and operational risk. The Bank's risk management policies are designed to identify and analyze these risks, to set appropriate risk limits and controls, and to monitor the risks and limits. The operational risk management functions are intended to ensure proper functioning of internal policies and procedures to minimise operational risk.

The Bank's Management Board under authority delegated by the Shareholders Meeting sets the Bank's general risk policy as well as specific policies for managing each type of major risk. The Bank's Credit and Investment Committee (CIC) and Interest Rates and Limits Committee (IRLC) establish risk limits under the guidelines set by risk policies. The work of CIC and IRLC is based on the proposals prepared by risk management departments, which are independent from departments that take risks in the normal cause of their business. Stress testing in relation to all major risks is conducted at least once a year.

Supervisory Board is informed of the major risks of the Bank on a quarterly basis.

Credit risk. The Bank is exposed to credit risk, which is a risk of a counterparty being unable to meet its credit obligations in whole or in part when due. The Bank manages credit risk in accordance with internal policies and procedures, which are reviewed and updated periodically, as well as on an ad-hoc basis.

The Bank's lending policies focus on the improvement of the credit quality and profitability of its loan portfolio and minimisation and diversification of credit risks. To minimise credit risk on the branch level, the CIC at the Central Head Office sets lending limits for the Regional Head Offices and branches that report to the Central Head Office directly. The Regional Head Offices then distribute these lending limits among branches, sub-branches and outlets that report to them. Loans that exceed these lending limits must be approved by the CIC of the Bank.

The Bank usually requires collateral and/or guarantees for loans. Acceptable collateral includes real estate, securities, transportation and production equipment, inventory, precious metals, certain contract rights and certain personal property. The Bank accepts guarantees from controlling shareholders (or other controlling persons) of small businesses, government entities, banks, other solvent legal entities, individuals (for loans to individuals). In order to reduce credit risk, several types of collateral may be used simultaneously.

Exposure Limits. To manage its credit risk, the Bank places its counterparties into risk groups, which reflect the possibility of default on their obligations. Counterparties placed into particular risk groups are assigned exposure limits. The Bank has procedures for calculation and review of risk limits for the following categories: corporate clients, Russian Federation subjects, municipal bodies, resident banks and non-resident banks. Exposure limits are also set for foreign countries, single and related borrowers and banking operations subject to credit risk.

Exposure limits for corporate clients are set on the basis of their ownership structure, business reputation, credit history, financial condition, future financial trends, quality of financial management, transparency, industry and regional position and facilities and equipment quality. On the basis of these factors, corporate clients are placed into risk groups and assigned long-term and short-term exposure limits.

Credit risk of federation subjects and municipal bodies is evaluated on the basis of their financial position and the level of development. The financial position is evaluated on the basis of credit history, debt level and compliance with its budget and budgetary norms. The level of development is evaluated on the basis of the current socio-economic development level, future socio-economic development potential and tax base quality. The Bank sets three types of exposure limits for federation subjects and municipal bodies: short-term (for transactions with a term no more than a year), temporary (for transactions that take place before their budgets are approved and have a term of no more than three months) and long-term (for transactions with a term of over a year). These limits are calculated on the basis of the federation subjects' budgets for the current year and reports relating to compliance with their budgets for a previous year. Exposure limits are not set and credit operations are not performed if a federation subject has no legal basis for credit operations or where its financial position or level of development indicate that credit transactions are not advisable.

30 Financial Risk Management (Continued)

Exposure limits for counterparty banks are set on the basis of their financial condition, position among comparable banks, transparency of asset and liability structure and operations, operating environment (for non-resident counterparty banks), capital structure, concentration of banking operations, credit history, business reputation and relationship with the Bank. Branch and/or banking group structure is also taken into account in setting exposure limits for a particular counterparty bank.

The amount of a loan granted to an individual is limited by his/her creditworthiness which is calculated individually for each client by using reducing ratios to the amount of his/her income and by taking into account the amount of his/her previous loans received and guarantees given. Also the amount of a loan depends on collateral provided by the client.

Risk Concentration. In order to reduce and diversify its credit risk, the Bank monitors its credit risk concentration, sets exposure limits for single borrowers and groups of related borrowers that are lower than those set by the Bank of Russia and sets limits for loans and bank guarantees made to related parties. Concentration and exposure limits for large credit operations and related borrowers and high-risk credit operations are approved at the Head Office level.

Monitoring. The Bank constantly monitors credit risks and exposure limits of various counterparties. Exposure limits for corporate clients are reviewed at least twice a year based on their year-end and interim financial information, for federation subjects and municipal bodies twice a year on the basis of their approved budgets, for resident banks on a monthly basis and for non-resident banks and foreign countries at least once a year. Exposure limits may also be reviewed on an ad-hoc basis, if required.

Credit risk for off-balance sheet financial instruments is defined as the possibility of sustaining a loss as a result of another party to a financial instrument failing to perform in accordance with the terms of the contract. The Bank uses the same credit policies in making conditional obligations as it does for on-balance sheet financial instruments through established credit approvals, risk control limits and monitoring procedures.

Market risk. The Bank takes on exposure to market risks. Market risk management includes management of interest rate risk, currency risk and equity risk. The Bank manages its market risks primarily through transaction limits set by the Interest Rates and Limits Committee (IRLC). Market risk limits are updated at least once a year and controlled constantly. The IRLC develops market risk management methodologies and sets limits on particular operations for the Central Head Office and Regional Head Offices. The Regional Head Offices have their own interest rates and limits committees that set limits for operations of the Regional Head Offices on the basis of the methodologies and limits set by IRLC. If necessary, the Regional Head Offices develop their own methodologies and set their own market risk limits. Market risk limits are set on the basis of the value-at-risk analysis, scenario analysis and stress testing. However, the use of this approach does not prevent losses outside of these limits in the event of more significant market movements.

30 Financial Risk Management (Continued)

Currency risk. The Bank takes on exposure to effects of fluctuations in the prevailing foreign currency exchange rates on its financial position and cash flows. The IRLC of the Bank sets limits on the level of exposure by currency and in total for both overnight and intra-day positions, which are monitored daily. The table below summarises the Bank's exposure to foreign currency exchange rate risk at 31 December 2006:

<i>In millions of Russian Roubles</i>	RR	USD	Euro	Other	Total

Credit related commitments (Note 31)	149 644	122 416	31 300	826	304 186

The Bank has extended loans and advances denominated in foreign currencies. Movements in foreign exchange rates affect the borrowers' repayment ability and incurrence of loan losses.

Liquidity risk. Liquidity risk is defined as the risk when the maturity of assets and liabilities does not match. The Bank is exposed to daily calls on its available cash resources from overnight deposits, current accounts, maturing deposits, loan draw downs, guarantees and from margin and other calls on cash settled derivative instruments. The Bank does not maintain cash resources to meet all of these needs as experience shows that a minimum level of reinvestment of maturing funds can be predicted with a high level of certainty. Liquidity risk is managed by the IRLC of the Bank.

Sberbank (Savings Bank of the Russian Federation)
Notes to the Financial Statements - 31 December 2006

30 Financial Risk Management (Continued)

The table below shows assets and liabilities at 31 December 2006 by their remaining contractual maturity, unless there is evidence that any of the assets are impaired and will be settled after their contractual maturity dates, in which case the expected date of settlement of the assets is used.

The liquidity position as per contractual maturity of the Bank's assets and liabilities at 31 December 2006 is set out below.

30 Financial Risk Management (Continued)

Management believes that, the matching and/or controlled mismatching of the maturities and interest rates of assets and liabilities is fundamental to the management of the Bank. It is unusual for banks ever to be completely matched since business transacted is often of an uncertain term and of different types. An unmatched position potentially enhances profitability, but can also increase the risk of losses. The maturities of assets and liabilities and the ability to replace, at an acceptable cost, interest-bearing liabilities as they mature, are important factors in assessing the liquidity of the Bank and its exposure to changes in interest and exchange rates.

The entire portfolio of trading securities and other securities at fair value through profit or loss is classified within demand and less than one month category as the portfolio is of a high liquid nature, and Management believes this is a fairer portrayal of its liquidity position.

Contractual maturity of trading portfolio as at 31 December 2006 is as follows: on demand and less than 1 month – nil; from 1 to 6 months – RR 4 636 million; from 6 to 12 months – RR 3 712 million; from 1 to 3 years – RR 112 071 million; more than 3 years – RR 89 744 million; no stated maturity – RR 478 million (2005: on demand and less than 1 month – nil; from 1 to 6 months – RR 4 409 million; from 6 to 12 months – RR 1 195 million; from 1 to 3 years – RR 20 477 million; more than 3 years – RR 105 235 million, no stated maturity – RR 499 million).

Contractual maturity of other securities at fair value through profit or loss as at 31 December 2006 is as follows: on demand and less than 1 month – nil; from 1 to 6 months – RR 19 146 million; from 6 to 12 months – RR 9 386 million; from 1 to 3 years – RR 71 580 million; more than 3 years – RR 123 591 million; no stated maturity – RR 14 144 million (2005: on demand and less than 1 month – nil; from 1 to 6 months – RR 31 134 million; from 6 to 12 months – RR 16 024 million; from 1 to 3 years – RR 72 871 million; more than 3 years – RR 94 581 million; no stated maturity – RR 12 672 million).

Management believes that in spite of a substantial portion of customer accounts and deposits from individuals being on demand (as at 31 December 2006 total customer deposits and deposits from individuals on demand amounted to RR 939 802 million (2005: RR 668 498 million)), diversification of these deposits by number and type of depositors, and the past experience of the Bank would indicate that these customers accounts and deposits from individuals provide a long-term and stable source of funding for the Bank.

However, in accordance with Russian Civil Code, individuals have a right to withdraw their deposits prior to maturity if they forfeit their right to accrued interest. The Bank utilises a wide range of market instruments to support a level of liquidity sufficient for both current and forecasted financial obligations including the disposals of liquid assets and attraction of funding in domestic and international capital markets.

Liquidity requirements to support calls under guarantees and standby letters of credit are considerably less than the amount of the commitment because the Bank does not generally expect the third party to draw funds under the agreement. The total outstanding contractual amount of commitments to extend credit does not necessarily represent future cash requirements, since many of these commitments will expire or terminate without being funded.

Interest rate risk. The Bank takes on exposure to the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows. Interest margins may increase as a result of such changes but may reduce or create losses in the event that unexpected movements arise. The table below summarises the Bank's exposure to interest rate risks at 31 December 2006. Included in the table are the Bank's assets and liabilities at carrying amounts, categorised by the earlier of contractual repricing or maturity dates.

30 Financial Risk Management (Continued)

The Bank is exposed to cash flow interest rate risk, principally through assets and liabilities for which interest rates are reset as market rates change. Such assets and liabilities are primarily presented in the above table as being repriced in the short-term. The Bank is exposed to fair value interest rate risk as a result of assets and liabilities at fixed interest rates; these are primarily presented in the above table as being repriced in the long-term. In practice, interest rates that are contractually fixed on both assets and liabilities are usually renegotiated to reflect current market conditions.

To manage interest rate risk the IRLC sets uniform fixed interest rates for deposits of and loans to individuals for Head Office and Regional Head Offices, maximum interest rates on deposits of legal entities, minimum interest rates for loans to legal entities. The Board sets interest rates for deposits of and loans to individuals after their approval by IRLC. Interest rates for deposits of and loans to individuals generally depend on maturity of the loan or deposit, its amount and category of the client. Head Office and Regional Head Offices attract funds and place them with the legal entities taking into consideration interest rate limits which provide effective performing of transactions on asset and liability sides. The IRLC also sets limits restricting long-term operations on the asset side.

The table below summarises the effective interest rates by major currencies for major debt instruments. The analysis has been prepared based on period-end effective rates used for amortisation of the respective assets/liabilities.

<i>In % p.a.</i>	2006		2005	
	RR	Other currencies	RR	Other currencies
Assets				
Cash and cash equivalents	0.9	3.4	0.8	1.6
Debt trading securities	8.4	5.7	4.1	5.4
Other debt securities at fair value through profit or loss	6.2	5.7	5.6	5.5
Due from other banks	5.6	3.7	5.7	2.5
Loans and advances to customers	12.6	9.2	14.1	8.4
Repurchase receivable	-	-	-	10.7
Debt investment securities held to maturity	-	15.8	-	15.8
Liabilities				
Due to other banks	1.5	3.2	2.0	5.9
Deposits from individuals	6.0	5.6	6.6	5.2
Customer accounts	2.1	4.6	2.1	2.5
Debt securities in issue	2.8	2.0	1.3	4.9
Other borrowed funds	-	6.1	-	5.9
Subordinated debt	-	6.4	-	6.4

The sign "-" in the table above means that the Bank does not have the respective assets or liabilities in corresponding currency.

31 Contingencies and Commitments

Legal proceedings. From time to time and in the normal course of business, claims against the Bank are received. On the basis of its own estimates and internal and external professional advice the Management is of the opinion that no material losses will be incurred in respect of claims and accordingly no provision has been made in these financial statements.

31 Contingencies and Commitments (Continued)

Tax legislation. Russian tax, currency and customs legislation is subject to varying interpretations, and changes, which can occur frequently. Management's interpretation of such legislation as applied to the transactions and activity of the Bank may be challenged by the relevant regional and federal authorities. Recent events within the Russian Federation suggest that the tax authorities may be taking a more assertive position in their interpretation of the legislation and assessments, and it is possible that transactions and activities that have not been challenged in the past may be challenged. As a result, significant additional taxes, penalties and interest may be assessed. Fiscal periods remain open to review by the authorities in respect of taxes for three calendar years preceding the year of review. Under certain circumstances reviews may cover longer periods.

Capital expenditure commitments. At 31 December 2006 the Bank has contractual capital expenditure commitments in respect of premises and equipment totalling RR 5 393 million (2005: RR 2 705 million) and in respect of computer equipment installation of RR 1 684 million (2005: RR 784 million). The Bank has already allocated the necessary resources in respect of these commitments. The Bank believes that future net income and funding will be sufficient to cover this and any similar such commitments.

Operating lease commitments. Where the Bank is the lessee, the future minimum lease payments under operating leases, both cancellable and non-cancellable, are as follows:

<i>In millions of Russian Roubles</i>	2006	2005
Not later than 1 year	3 154	2 446
Later than 1 year and not later than 5 years	6 020	5 702
Later than 5 years	7 850	8 323
Total operating lease commitments	17 024	16 471

Credit related commitments. The primary purpose of these instruments is to ensure that funds are available to a customer as required. Guarantees and standby letters of credit, which represent irrevocable assurances that the Bank will make payments in the event that a customer cannot meet its obligations to third parties, carry the same credit risk as loans. Documentary and commercial letters of credit, which are written undertakings by the Bank on behalf of a customer authorising a third party to draw drafts on the Bank up to a stipulated amount under specific terms and conditions, are collateralised by the underlying shipments of goods to which they relate or cash deposits and therefore carry less risk than a direct lending.

31 Contingencies and Commitments (Continued)

Commitments to extend credit represent unused portions of authorisations to extend credit in the form of loans, guarantees or letters of credit. With respect to credit risk on commitments to extend credit, the Bank is potentially exposed to loss in an amount equal to the total unused commitments. However, the likely amount of loss is less than the total unused commitments since most commitments to extend credit are contingent upon customers maintaining specific credit standards. The Bank monitors the term to maturity of credit related commitments because longer-term commitments generally have a greater degree of credit risk than shorter-term commitments. Outstanding credit related commitments are as follows:

<i>In millions of Russian Roubles</i>	2006	2005
Undrawn credit lines and commitments to extent credit	198 026	182 849
Export letters of credit	133 588	68 486
Import letters of credit and letters of credit for domestic settlements	97 309	37 172
Guarantees issued	27 927	15 679
Total credit related commitments	456 850	304 186

At 31 December 2006 included in customer accounts are deposits of RR 50 714 million (2005: RR 33 113 million) held as collateral for irrevocable commitments under import letters of credit. Refer to Note 16.

The total outstanding contractual amount of undrawn credit lines, letters of credit, and guarantees does not necessarily represent future cash requirements, as these financial instruments may expire or terminate without being funded.

Contingent asset. In December 2005 the Bank has performed a set-off transaction following its claim for premature termination of a secured borrowing agreement with a foreign counterparty. The netting of mutual obligations performed by the Bank resulted in a receivable in the amount of USD 120 million (RR equivalent of 3 457 million), which represented the difference between the fair value of the securities pledged and the amount of borrowings plus accrued interest.

In 2006 the Bank was successful in the UK High Court and in the US District Court for the Southern District of New York for the amount of USD 124 million in respect of its court claim against the above counterparty. In June 2006 the Bank signed a settlement agreement with its foreign counterparty-defendant following the Court ruling and recorded a gain in the income statement in the amount of USD 124 million (RR equivalent of 3 346 million). The item was disclosed as a contingent asset as at 31 December 2005. In accordance with the payment schedule under the above mentioned agreement the Bank has collected the debt in full in June - October 2006.

31 Contingencies and Commitments (Continued)

Fiduciary assets. These assets are not included in the Bank's balance sheet as they are not assets of the Bank. Nominal values disclosed below are normally different from the fair values of respective securities. The fiduciary assets fall into the following categories:

<i>In millions of Russian Roubles</i>	2006 Nominal value	2005 Nominal value
GKO and OFZ	53 328	396
Corporate shares	21 839	14 429
Promissory notes	17 687	5 236
Corporate bonds	2 550	4 587
VneshEconomBank bonds (VEB bonds)	1 090	1 350
Debt securities of municipal and subfederal bodies of the Russian Federation	971	2 201
Bonds of the Bank of Russia	303	-
Other securities	1 187	495

Assets pledged and restricted. At 31 December 2006 and at 31 December 2005 the Bank has the following assets pledged as collateral:

<i>In millions of Russian Roubles</i>	2006		2005	
	Asset pledged	Related liability	Asset pledged	Related liability
Repurchase receivable	-	-	1 659	1 472
Total	-	-	1 659	1 472

Mandatory cash balances with the Bank of Russia in the amount of RR 77 915 million (2005: RR 56 809 million) represent mandatory reserve deposits, which are not available to finance the Bank's day-to-day operations.

As at 31 December 2006 the Bank has pledged securities with fair value of RR 69 603 million (2005: RR 61 853 million) on the special accounts with the Bank of Russia as collateral against overnight interbank borrowings that the Bank attracts on a regular basis from the Bank of Russia.

As at 31 December 2006 restricted cash represents monetary funds in the amount of RR 4 million (2005: RR 655 million) which collateralise settlements on irrevocable letters of credit.

32 Derivative Financial Instruments

Foreign exchange and other derivative financial instruments entered into by the Bank are generally traded in an over-the-counter market with professional market counterparties. Derivatives have potentially favourable (assets) or unfavourable (liabilities) conditions as a result of fluctuations in market interest rates, foreign exchange rates or other variables relative to their terms. The aggregate fair values of derivative financial assets and liabilities can fluctuate significantly from time to time.

The table below sets out fair values, at the balance sheet date, of currencies receivable or payable under foreign exchange forward and futures contracts entered into by the Bank. The table covers the contracts with settlement dates after the respective balance sheet date. The contracts are short term in nature.

	Domestic counterparties				Foreign counterparties

Total	26 756	(25 984)	800	(28)	28 595	(28 601)	44	(50)

In respect of derivatives outstanding at 31 December 2006 the Bank has recorded a net loss of RR 42 million (2005: net gain of RR 50 million) within net gains/(losses) arising from trading in foreign currencies and a net loss of RR 43 million (2005: net gain of RR 716 million) within other operating income.

During the year the Bank has received a net gain on foreign currency derivatives of RR 2 637 million (2005: net loss of RR 2 173 million), which is recorded in the Bank's income statement within net gains/(losses) arising from trading in foreign currencies.

33 Fair Value of Financial Instruments

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

The estimated fair values of financial instruments have been determined by the Bank using available market information, where it exists, and appropriate valuation methodologies. However, judgement is necessarily required to interpret market data to determine the estimated fair value. Despite the Russian Federation is assigned investment grade ratings, the Russian economy continues to display some characteristics of an emerging market and economic conditions continue to limit the volume of activity in the financial markets. Some market quotations may be outdated or reflect distress sale transactions and therefore may not represent fair values of financial instruments. Management has used all available market information in estimating the fair value of financial instruments.

Financial instruments carried at fair value. Trading securities, other securities at fair value through profit or loss including those classified as repurchase receivable and financial derivatives are carried on the balance sheet at their fair value.

33 Fair Value of Financial Instruments (Continued)

Loans and receivables carried at amortised cost. The fair value of floating rate instruments is normally their carrying amount. The estimated fair value of fixed interest rate instruments is based on estimated future cash flows expected to be received discounted at current interest rates for new instruments with similar credit risk and remaining maturity. Refer to Notes 10 and 11 for the estimated fair values of due from other banks and loans and advances to customers, respectively.

Investment securities held to maturity. Fair value for investment securities held to maturity is based on quoted market prices. Refer to Note 12 for the estimated fair value of investment securities held to maturity.

Liabilities carried at amortised cost. The fair value is based on quoted market prices, if available. The estimated fair value of fixed interest rate instruments with stated maturity, for which a quoted market price is not available, was estimated based on expected cash flows discounted at current interest rates for new instruments with similar credit risk and remaining maturity. The fair value of liabilities repayable on demand or after a notice period ("demandable liabilities") is estimated as the amount payable on demand, discounted from the first date that the amount could be required to be paid. Refer to Notes 15, 16, 17, 18 and 20 for the estimated fair values of due to other banks, deposits of individuals and customer accounts, debt securities in issue, other borrowed funds and subordinated debt, respectively.

Derivative financial instruments. All derivative financial instruments are carried at fair value as assets when the fair value is positive and as liabilities when the fair value is negative. Refer to Note 32.

34 Related Party Transactions

For the purposes of these financial statements, parties are considered to be related if one party has the ability to control the other party, is under common control, or can exercise significant influence over the other party in making financial or operational decisions. In considering each possible related party relationship, attention is directed to the substance of the relationship, not merely the legal form. Transactions with related parties are entered into the normal course of business and are priced at market rates.

The Bank's principal shareholder is the Bank of Russia (refer to Note 1). As the Bank continues to apply IAS 24 "Related Party Disclosures" (revised), respective disclosures are made in Note 35 for transactions with state-controlled entities and government bodies.

The table in this note represent balances and results of operations with the Bank's principal shareholder, the Bank of Russia, and other related parties, not disclosed in Note 35.

34 Related Party Transactions (Continued)

At 31 December 2006, the outstanding balances with related parties were as follows:

<i>In millions of Russian Roubles</i>	2006		2005	
	The Bank of Russia	Other related parties(*)	The Bank of Russia	Other related parties (*)
Assets				
Mandatory cash balances with the Bank of Russia	77 915	-	56 809	-
Account with the Bank of Russia (other than mandatory cash balances)	8 221	-	26 946	-
Discount debt securities	87 500	-	24 461	-
Due from other banks (contractual interest rate: 4.0% – 5.2%)	875	-	3 498	-
Gross amount of loans and advances to customers (contractual interest rate: 1.9% - 17.1%)	-	18 831	-	17 717
Impairment provisions for loans and advances to customers	-	(219)	-	(480)
Other assets	-	-	-	10
Liabilities				
Customer accounts (contractual interest rate: 2.4% - 4.9%)	-	1 162	-	503
Credit related commitments				
Import letters of credit at the year end	-	211	-	359
Guarantees issued by the Bank at the year end	-	2 034	-	-

(*) Other related parties are represented mostly by leasing subsidiary of the Bank, CJSC "RG-Leasing".

Income and expense items with related parties for the year were as follows:

<i>In millions of Russian Roubles</i>	2006		2005	
	The Bank of Russia	Other related parties	The Bank of Russia	Other related parties
Interest income	3 099	2 108	723	1 905
Interest expense	(113)	(16)	(126)	(20)
Gains less losses arising from trading securities and other securities at fair value through profit or loss	3 681	-	1 964	-
Other operating income	-	78	-	98
Other operating expenses	(251)	(86)	(216)	(113)

In 2006, the remuneration of members of the key management personnel comprised salaries and bonuses totalling RR 865 million (2005: RR 522 million).

35 Operations with State-Controlled Entities and Government Bodies

As stated in Note 34, the Bank continues to apply IAS 24 "Related Party Disclosures" revised. Disclosures are made below for transactions with state-controlled entities and government bodies.

Currently the Government of the Russian Federation does not provide to the general public or entities under its ownership/control a complete list of the entities which are owned or controlled directly or indirectly by the State. Under these circumstances the Management of the Bank disclosed only information that its current internal management accounting system allows to present in relation to operations with state-controlled entities and where the Management believes such entities could be considered as state-controlled based on its best knowledge. These financial statements disclose operations with government bodies and entities, in which the government directly owns more than 50% of the share capital. In relation to state-controlled entities, Management analysed the Bank's transactions with its largest customers and extracted balances and results of operations in relation to the following groups of entities which were included in the tables below: 1) 100% State subsidiaries and government bodies and 2) largest entities where the State controls over 50% of its share capital.

Transactions with government bodies and state-controlled entities are entered into the normal course of business and priced at market rates. At 31 December 2006, the outstanding balances with state-controlled entities and government bodies were as follows:

	2006		2005	
	100% owned State subsidiaries and government bodies	Entities where the State controls over 50% of share capital	100% owned State subsidiaries and government bodies	Entities where the State controls over 50% of share capital
<i>In millions of Russian Roubles</i>				
Cash and cash equivalents	17 468	422	-	3 261
Due from other banks	1 341	349	-	240
Trading securities	113 964	2 680	101 236	3 379
Other securities at fair value through profit and loss	213 398	11 562	210 925	10 716
Gross amount of loans and advances to customers	119 496	139 656	84 132	24 178
Impairment provisions for loans and advances to customers	(502)	(1 208)	(1 054)	(796)
Repurchase receivable	-	-	1 659	-
Investment securities held to maturity	26 198	-	28 299	-
Customer accounts	87 181	20 681	69 537	121 225

Income and expense items with State subsidiaries and government bodies for the reporting period were as follows:

	2006		2005	
	100% owned state subsidiaries and government bodies	Entities where the state controls over 50% of share capital	100% owned state subsidiaries and government bodies	Entities where the state controls over 50% of share capital
<i>In millions of Russian Roubles</i>				
Interest income	38 483	1 826	38 326	3 014
Interest expense	(2 337)	(1 016)	(938)	(1 636)
Gains less losses arising from trading securities and other securities at fair value through profit or loss	(1 442)	197	12 448	335
Gains less losses arising from investment securities available for sale	-	-	5	-
Gains less losses arising from investment securities held to maturity	-	-	4 181	-
Gain on settlement of a receivable	3 346	-	-	-
Fee and commission income	2 174	167	2 711	779

Transactions with the State include taxes which are detailed in Note 26.

36 Capital Adequacy Ratio

As of 31 December 2006, Capital Adequacy Ratio calculated by the Bank in accordance with the International Convergence of Capital Measurement and Capital Standards (July 1988, updated to November 2005) (or Basel Capital Accord) requirements was as follows:

	2006	2005
Core capital adequacy ratio (Tier 1)	9.9%	10.3%
Total capital adequacy ratio (Tier 1 and Tier 2)	11.2%	12.5%

37 Subsequent events

On 21 December 2006, the Supervisory Board of the Bank approved the issuance of 3 500 000 additional ordinary shares with a nominal value of RR 3 000 by way of a public offering in Russia in the first quarter of 2007. The issue's results were approved by the Bank of Russia on 29 March 2007. The amount of shares placed under this issue is 2 586 948 units. The amount of cash brought in to pay for the shares under the additional issue comprised RR 230 238 million. As a result the share capital of the Bank under IFRS will be set in the amount of RR 87 741 million. The share of the Bank of Russia after the placement comprises 60.3% of ordinary shares or 57.6% of all the issued and outstanding shares of the Bank. The Bank has received RR 222 478 million of share premium.
